PERSONAL PROJECTS

Mobile Shopping
- To utilize a mobile shopping project with ASP.NET C#, users access the website through their mobile browsers.
- They can browse product categories, view item details, add products to their cart, proceed to checkout, and make payments securely.
- The project leverages responsive design to ensure a smooth shopping experience across various mobile devices.

Personal portfolio
- Portfolio is shown to my personal details.
- it provides skills, projects, about me, my social media references etc.

Apartment Security
- To use an Apartment Security project with PHP, residents log in to the system via a web browser.
- They can request services like maintenance or report incidents.
- Security personnel manage access permissions, monitor cameras, and respond to alerts, ensuring a safe environment for residents through PHP-powered functionalities.
